Anchor Brewing

Anchor Brewing has played a significant role in San Francisco's history and their unique beers are all produced in one of the most traditional and handsome breweries in the USA - each brew made from an all-malt mash in their handcrafted copper brew house.

Anchor Steam

'The classic of American brewing tradition since 1896', Anchor Steam has a bronze colour with a thick creamy head. The palate is full and malty with a beautiful bitter hop aroma - a unique beer universally recognised as a world classic that traces back to the Gold Rush era.

Liberty Ale

First introduced in 1975, Liberty Ale is brewed with a top-fermenting ale yeast, responsible for many of the subtle flavours and characteristics. Dry-hopping imparts a unique aroma to the ale.

Anchor Porter

A unique dark brew which uses specially roasted malts, a top-fermenting yeast and only fresh whole hops. All this combines to produce a rich and intense flavour with subtle notes of chocolate, toffee, and coffee.

Anchor Old Foghorn

A strong barley wine, dry hopped throughout the maturation period of some 6 months. Although the yeast is unable to ferment all sugars out of any beer at this strength the hop flavours make a balanced brew ideal for sipping after dinner.

You may not know, but...

The origins of the name *steam beer* is shrouded in mystery. One explanation being that extra yeast was added to barrels before being shipped up the Sacramento River; this caused added fermentation on route and a gush of foam on tapping the kegs.
